

Parents' Guide to the Early Years Foundation Stage Framework

Exciting times ahead for you and your child

What is the Early Years Foundation Stage?

Welcome to the **Early Years Foundation Stage (EYFS)**, which is how the Government and early years professionals describe the time in your child's life between birth and age 5.

This is a very important stage as it helps your child get ready for school as well as preparing them for their future learning and successes. From when your child is born up until the age of 5, their early years experience should be happy, active, exciting, fun and secure; and support their development, care and learning needs.

Happy Faces delivers the EYFS and must follow a legal document called the Early Years Foundation Stage Framework.

What is the EYFS Framework – why do we have one?

The EYFS Framework exists to support all professionals working in the EYFS to help your child, and was developed with a number of early years experts and parents.

In 2014 the framework was revised to make it clearer and easier to use, with more focus on the things that matter most. This framework also has an emphasis on your role in helping your child develop.

It sets out:

- The legal welfare requirements that everyone registered to look after children must follow to keep your child **safe** and promote their welfare
- The 7 areas of **learning and development** which guide professionals' engagement with your child's play and activities as they learn new skills and knowledge
- Assessments that will tell you about **your child's progress** through the EYFS
- Expected levels that your child should reach at age 5, usually the end of the reception year; these expectations are called the "**Early Learning Goals (ELGs)**"

There is also guidance for the professionals supporting your child on planning the learning activities, and observing and assessing what and how your child is learning and developing.

What does it mean for me as a parent?

Ensuring my child's safety

Much thought has been given to making sure that your child is as safe as possible. Within the EYFS there is a set of welfare standards that everyone must follow. These include the numbers of staff required in a nursery, how many children a childminder can look after, and things like administering medicines and carrying out risk assessments.

Quality

You can find out about the quality of your child's nursery and other early years providers in relation to the EYFS Framework by checking what the Government's official inspection body for early years, Ofsted, has to say about it. You can find this information at www.ofsted.gov.uk/inspection-reports/find-inspection-report.

How my child will be learning

The EYFS Framework explains how and what your child will be learning to support their healthy development.

Your child will be learning skills, acquiring new knowledge and demonstrating their understanding through **7 areas of learning and development**.

Children should mostly develop the **3 prime areas** first. These are:

- Communication and language;
- Physical development; and
- Personal, social and emotional development.

These prime areas are those most essential for your child's healthy development and future learning.

As children grow, the prime areas will help them to develop skills in **4 specific areas**. These are:

- Literacy;
- Mathematics;

- Understanding the world; and
- Expressive arts and design.

These 7 areas are used to plan your child's learning and activities. The professionals teaching and supporting your child will make sure that the activities are suited to your child's unique needs. This is a little bit like a curriculum in primary and secondary schools, but it's suitable for very young children, and it's designed to be really flexible so that staff can follow your child's unique needs and interests.

Children in the EYFS learn by playing and exploring, being active, and through creative and critical thinking which takes place both indoors and outside

Try to speak to your child's key person as often as possible about what your child has been doing, what they have enjoyed, what they need to be doing more of and what you can do at home.

All the fun activities that you do with your child at home are important in supporting their learning and development, and have a really long lasting effect on your child’s learning as they progress through school.

Even when your child is very young and is not yet able to talk, talking to them helps them to learn and understand new words and ideas. If you make the time

every day to do some of the following things with your child it will make a real difference to your child’s confidence as a young learner.

If you’re looking for new ideas for things to do then find out what is on offer at your local children’s centre. Many offer ‘messy play’ activities which you and your child can join in with, and many of the activities they provide are free. Staff can also give you advice about the kinds of books or other activities your child might enjoy at different ages.

How can I find out how my child is getting on?

It is important that you and the professionals caring for your child work together. You need to feel comfortable about exchanging information and discussing things that will benefit your child. At Happy Faces we provide each child with a “**key person**”. This is the person who:

- Is your main point of contact within the setting
- Helps your child to become settled, happy and safe
- Is responsible for your child’s care, development and learning

- Takes a careful note of your child's progress, sharing this with you and giving you ideas as to how to help your child at home

You should be able to get information about your child's development at any time and there are two stages (at age 2, and again at age 5) when the professionals caring for your child must give you written information about how he or she is doing.

When your child is 2

At some point after your child turns 2, your child's keyperson will give you a written summary of how your child is progressing against the 3 prime areas of learning:

- communication and language;
- physical development; and
- personal, social and emotional development.

This is called **the progress check at age 2**.

This check will highlight areas where your child is progressing well and any where they might need some extra help or support – and how mums and dads and other family members or carers can work with the key person to help. You might find it useful to share the information from the check with other professionals such as health visitors (who can use it as part of the health and development review).

School Readiness – Preparing for the next stage

What it isn't

School readiness does not mean your child should be able to read, write and be a mathematician before they reach the school gates! Rather, is about providing children with the skills they need to be ready to learn.

What is it?

School readiness prepares children by helping them to engage with their learning through exploring, thinking skills, being motivated and engaged. The idea is that children need to be active in their learning in a variety of ways to get the best from it.

What does this mean for my child?

At Happy Faces we monitor the ways in which your child is engaging with their environment and other people. As well as taking note of their playing, exploring, creativity, thinking skills and motivation. It has been shown that these are the skills that children need to be effective learners.

When children start school they will be expected to be independent learners and providing them with skills at this stage will give them a great start. The prime areas of the EYFS underpin this with the focus on how your child is communicating and socialising as well their physical skills which form the basis of literacy.

For example at school your child may be expected to:

- Be able to ask for help when needed

- Communicate their needs
- Use the toilet independently
- Dress and undress themselves for PE
- Hold a pencil correctly
- Recognise their name
- Zip up their coat
- Sit and listen quietly for longer periods of time

We are here to help your child develop the skills that underpin learning so that when they go to school they are fully prepared to become mathematicians, literary geniuses, scientists or whatever they choose to become!

When your child is 5

At the end of the EYFS – in the summer term of the reception year in school – teachers complete an assessment which is known as the **EYFS Profile**. This assessment is carried out by the reception teacher and is based on what they, and other staff caring for your child, have observed over a period of time.

Another important part of the EYFS Profile is your knowledge about your child's learning and development, so do let your child's class teacher know about what your child does with you: such as how confident your child is in writing their name, reading and talking about a favourite book, speaking to people your child is not so familiar with or their understanding of numbers.

All of the information collected is used to judge how your child is doing in the 7 areas of learning and development. Finding out at this stage how your child is doing will mean that the teacher your child has in their next school year – year 1 – will know what your child really enjoys doing and does well, as well as helping them decide if your child needs a bit of extra support, what that support should be and if they are already getting it.

The school will give you a report of your child's progress, including information from his or her EYFS Profile.

Where can I go for further information?

The most important place to find out more is **speaking to a member of staff at Happy Faces**, do ask as many questions as you need to. We really do welcome speaking with you.

You may want to find out what is on offer at **your local children's centre**.

You can find the **Early Years Foundation Stage** which includes the early learning goals at www.foundationyears.org.uk. The foundation years website also includes a range of resources and contacts.
